

Serial No. 09/280,567

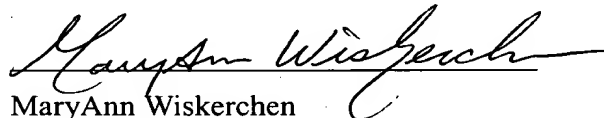

**REMARKS**

The above listed names are deleted from the subject application as their contribution to the subject invention is no longer being claimed. Although the claims encompass therapeutic treatments for mature Flint and these persons played a part in the invention of such therapies, since the particular therapeutic treatment for which they were involved are not claimed in this particular application, it appears appropriate to remove them as inventors. However, this should not be taken as an admission or estoppel against the claims covering such methods.

As required by 37 C.F.R. § 1.48(b), this Amendment is accompanied by the requisite petition and fee set forth in § 1.17(h) as listed on the enclosed fee submittal.

Further, as required by 37 C.F.R. § 1.48(b)(1), this amendment is diligently made as it just came to the attention of Applicants' representative that the inventive contribution of the persons listed above is not being claimed in this application.

Respectfully submitted,

MaryAnn Wiskerchen
